

# SOLAR CONTRACT CARPET

**SOLAR CONTRACT CARPET**  
recommends the use  
of furniture sliders

Available at most  
home improvement  
centers

## Helpful Tips to Prevent Damage On Resilient Sheet Flooring

- Always move heavy furniture and appliances with care to avoid gouging or tearing the floor.
- First, lay strips of plywood or hardboard panels on the floor, then “walk”, slide, or roll (if item is on wheels) these items on the strips.
- Do not push or pull appliances or heavy furniture across an unprotected floor without taking these precautions as **DAMAGE WILL OCCUR.**
- Heavy furniture and appliances that are moved often should be equipped with flat, non-staining composition furniture casters or cups of appropriate size.
- These casters are available in sizes ranging from 1½”-2⅝” square and 1⅜”-1⅝” round.
- Ball-shaped casters are not recommended for appliances or heavy furniture.
- If you have an upright vacuum cleaner, use the attachments for vinyl and hardwood floors when cleaning. Vacuuming with the cleaner’s beater bars may visibly damage vinyl flooring.

***For all of your floor covering needs***

Simply lift or tilt the furniture and place a slider pad under a leg or one end of the item to be moved, repeat for the other legs or end and push the item where you want it moved.
