

SOLAR CONTRACT CARPET

SOLAR CONTRACT CARPET
recommends the use
of furniture sliders

Available at most
home improvement
centers

Helpful Tips to Prevent Damage On Resilient Sheet Flooring

- Always move heavy furniture and appliances with care to avoid gouging or tearing the floor.
- First, lay strips of plywood or hardboard panels on the floor, then “walk”, slide, or roll (if item is on wheels) these items on the strips.
- Do not push or pull appliances or heavy furniture across an unprotected floor without taking these precautions as **DAMAGE WILL OCCUR.**
- Heavy furniture and appliances that are moved often should be equipped with flat, non-staining composition furniture casters or cups of appropriate size.
- These casters are available in sizes ranging from 1½”-2⅝” square and 1⅜”-1⅝” round.
- Ball-shaped casters are not recommended for appliances or heavy furniture.
- If you have an upright vacuum cleaner, use the attachments for vinyl and hardwood floors when cleaning. Vacuuming with the cleaner’s beater bars may visibly damage vinyl flooring.

Simply lift or tilt the furniture and place a slider pad under a leg or one end of the item to be moved, repeat for the other legs or end and push the item where you want it moved.
